SUSTAINABILITY EDUCATION FORUM

Saturday, January 25th, 2020
3:00-4:30 p.m.
St. Anthony Village Library
2941 Pentagon Dr. N.E.
St. Anthony , MN 55418

Presentation:

A Sustainable Population = A More Sustainable Future

Alan Ware, speaker

Alan Ware serves as Research Associate with World Population Balance in Minneapolis, Minnesota. His other duties include assisting with website research, newsletter writing, social media, hosting at times for online population meetups, participating in WPB podcasts, and giving public presentations. As a “big picture” thinker, Alan understands the crucial role that population balance must play in creating a more sustainable future. In addition to addressing population issues, he follows the unfolding and intertwined financial, energy, and environmental crises, and the broader predicament they signify: the impossibility of infinite growth on a finite planet.

NOTE
Seating is limited to 30 persons!
